INTERIOR LOW VOC SOLUTIONS

Low environmental impact solutions for green projects

GREEN STAR PROJECT SOLUTIONS

Wattyl is committed to global best practice, environmental performance and safe manufacturing.

Wattyl has a selection of interior products that are **GECA** and **GBCA** verified for Green Star projects.

GECA - Good Environmental Choice Australia is an internationally recognised sustainability rating system helping to improve environmental efficiencies in buildings and improving the health and well-being of our communities.

GECA certification standards are developed following ISO 14024 principles for global best practice in eco-labelling.

After a comprehensive assessment, a number of Wattyl paint products have been awarded an Australia Good Environmental Choice Licence.

APAS - Australian Paint Approval Scheme is the largest listing and accreditation scheme for the coatings industry. APAS tests and certifies paints and coatings to ensure they meet stringent performance specifications.

GREEN BUILDING COUNCIL OF AUSTRALIA

GBCA Green Star assesses the sustainable design, construction and operation of buildings, fitouts and communities.

This voluntary environmental labelling standard for architectural and protective coatings identifies products that use safer alternative ingredients, or substances at levels that are not considered as hazardous.
