GENERATIONS**

WATTYL HAS A PROUD HERITAGE OF MAKING QUALITY, HIGH PERFORMANCE PAINTS & COATINGS

Over the decades, Wattyl has built an enviable portfolio of brands and a valuable knowledge base of experience across a broad spectrum of substrates.

Our brands and our involvement with high profile projects are the result of a strong commitment to research and development. This investment means we can manufacture products of the highest quality, designed to deliver superior application, a professional finish and committed support to our partners.

Today, Wattyl is an iconic brand offering professional paint solutions, ensuring success across these segments:

- Residential
- Commercial
- Industrial

Our manufacturing plants, distribution network and logistics, supported by world-leading coating expertise and technology help to provide best-in-class performance, durability and aesthetics.

SHERWIN-WILLIAMS®

Maintaining our position as a leader in innovation has been greatly enhanced by the support of parent company, Sherwin Williams.

Over the last 150 years Sherwin Williams has built a reputation for product excellence, investing millions in research and development. We'll be putting this to good use to ensure Wattyl remains a formidable force well into the future, for our people and our customers.

WHY WATTYL?

With a proud heritage of innovation, Wattyl delivers high performance coatings to protect and enhance every home from interior, exterior, texture, to protective and specialty finishes.

Specialised Solutions

- Wattyl manufactures a comprehensive range of solutions, from decorative to frequently visited environments, for both interior and exterior.
- A coating solution for almost every application and budget, made for Australian and New Zealand conditions and market requirements.
- A range of specification selector options to make choosing the right coating system easier.

Environmental Performance and Accreditation

Wattyl is committed to global best practice, environmental performance and safe manufacturing, with the aim to reduce air pollution, material use and energy consumption.

Proudly endorsed by:

Our certifications, accreditations, associations and affiliations include:

Colour

- Wattyl's COLOUR DESIGNER® colour palette offers an integrated range of market relevant colours to complement any project whether residential or commercial, new or repaint.
- Register your company on colourdesigner.net.au or colourdesigner.co.nz to access FREE samples and view the full COLOUR DESIGNER® palette.
- Wattyl makes colour specification easy, with downloadable colour palettes for BIM applications, sample services, custom colour matching, and precision tinting for colour accuracy.

Support

- Wattyl Assist provides comprehensive support for all enquiries relating to colour, products and technical support.
- Working infield, Wattyl's sales representatives provide national support and service to your painters from application methods through to achieving specification compliance.

Warranties

- Wattyl warrants that our products, correctly applied according to specifications, will not flake, peel or blister.
- Warranty periods depend on types of coatings specified, substrate type and location of surfaces being coated.

National Distribution

With over three hundred distribution outlets in Australia and twenty plus in New Zealand, the Wattyl network offers an extensive range of coatings and accessories with expert advice, accurate tinting, and reliable delivery.

WHERE IS PAINT SPECIFIED?

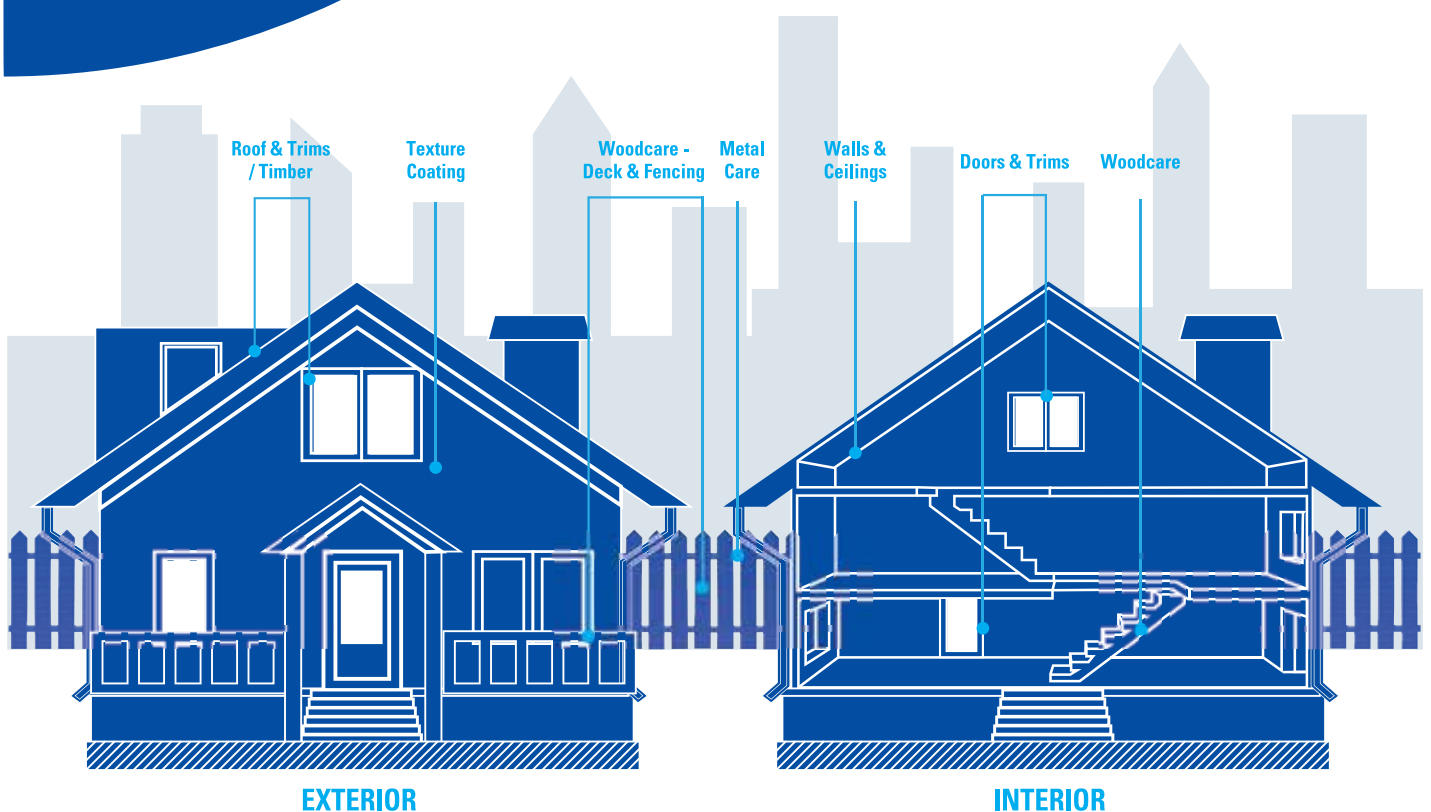

Everywhere you look there is paint. Our innovative products cover the home: from the walls, to the ceiling, skirting boards, cornices, interior and exterior window trims and wooden flooring. The exterior of the home is also covered with paint, from cladding to roofing to texture facades and all the fitting and fixtures surrounding the home.

Whether the home requires aesthetics, protection against environmental elements or sustainability benefits, there is a Watty paint technology that will do just that and more.

PAINT AND COLOUR IS ALL AROUND US.

The first thing people notice about any Watty paint is the colour and finish. They don't see the innovative technology that goes into every product.

At Watty, innovation plays an integral role and we are committed to developing technologies that are better for homes you build, and our planet. Because no matter where you look, paint and colour is all around us.

HOW TO SPECIFY THE RIGHT PAINT AND COATINGS FOR THE RIGHT AREAS

INTERIOR

BROADWALL & CEILINGS

Wattyl I.D. Advanced Total Protection Technology™ now delivers increased levels of protection, with anti-microbial and low VOC properties.

PREPCOATS & ENAMELS

Wattyl has developed an extensive range of superior oil-based and water-based precoats and enamels. Together with the Wattyl I.D. Advanced finishing coats, this range will deliver optimum protection and enhance the home.

EXTERIOR

EXTERIOR PAINT

Wattyl's flagship brand Solagard has been formulated to withstand harsh weather conditions. Tried, tested and trusted for decades, Solagard's Total Protection Technology™ provides complete protection against cracking, peeling, blistering and flaking.

TEXTURE

Granosite has a range of texture coating systems that offer a variety of flexible textures and builds from a low-build smooth stipple, to a medium-build bag and paint, and a high-build stucco look to provide long-term asset protection.

WOODCARE

INTERIOR

Estapol's Interior polyurethane and flooring range is extremely tough, durable, flexible and hard-wearing.

EXTERIOR

Wattyl Weathergard incorporates the latest technological advances in weather protection for all external timber surfaces. The range includes oils, stains, paints and varnishes.

METALCARE

INTERIOR/ EXTERIOR

Killrust is a leader in high quality preparatory and topcoat paints that protect metal surfaces from harsh climate conditions.
