## How paint can influence your **design choices**

Specifiers are constantly faced with the daunting task of deciding on the purpose, colour, texture and performance of every piece of material in their design.

Wattyl's professional paints are designed to provide solutions in sustainable outputs, material performance, high quality aesthetics, wellness elements and expressions of colour.

**We offer 1.0 formal CPD point for this topic.**

This one hour presentation is informative and engaging, offering insights on the importance of incorporating the right sustainable solutions into your design.

Contact us for your next CPD activity. Wattyl is located in all major metro cities across Australia.

## Understanding Low VOC Paint

Discover how low VOC paint can positively benefit human wellbeing, and its sustainable affects on the built environment.

This presentation will help you:

- Understand what are VOCs and how it affects material selection and sustainability choices
- Understand regulatory standards for VOCs in Australia
- Identify VOC limits in paints and how this may affect product selection
- Link VOC standards against Green Star Credits
- Identify ecolabels and how they assist in specifying the right materials for effective design outcomes
